OSMERINI LUCIANO

IT SUPPORT ANALYST | FULL STACK DEVELOPER

INCIDENT RESOLUTION, WEB DEVELOPMENT AND PROCESS AUTOMATION

351-6566274 - www.linkedin.com/in/luciano-osmerini - Losmerini@outlook.es

I have extensive experience in first, second and third-level support, systems administration, hardware/software maintenance, and database management. Highly experienced in ticketing systems and remote support. Recognized for empathy, communication, and problem-solving skills, always focused on learning new technologies.

WORK EXPERIENCE

Developer & IT Support - Apex Technology (North American Company) **Apr 2026 - present**

Developing and integrating APIs and Web Services. Backend, using Python and Node.js.
Frontend development and UI improvements and support for development teams.
Managing and configuring network infrastructure using Ubiquiti / UniFi solutions, ticketing workflows and technical support operations through HappyFox.

Customer Support T2 - Koronet (Netherlands) | Project **Jun 2026 - Aug 2026**

Handled complex customer support cases through email, phone and chat.
Investigated and tested issues using Postman, MySQL, Java, JavaScript, CSS, HTML and Windows Services.
Collaborated with Engineering and Product teams to track and resolve customer issues.
Worked in a macOS environment, with multiple Git repositories, reverse-engineering projects, and Google Workspace.

Developer - Atento S.A. **Jan 2025 - Apr 2026**

Develop and execute specialized projects using Python integrated with SQL for data analysis and process automation in web-based CRM tools with HTML and Bootstrap.
Featured Project - IT Web App: Designed and developed a responsive web application that automates repetitive IT and administrative tasks and processes. Achieved a 90% reduction in incident resolution time (from 30 minutes to 3 minutes). The application integrates a chatbot that provides user assistance, suggests solutions, and streamlines the support workflow, improving IT team efficiency and increasing operational availability.

IT Support Technical Analyst - Atento S.A. **Sep 2022 - Jan 2025**

Resolving software/hardware issues in a corporate environment (Windows, network, printers).
Managing Active Directory, users, permissions, and profiles. Using ticketing tools (ServiceNow).
Logs verification and troubleshooting, communicating with technical departments and internal users to escalate and document solutions.

Database Analyst - Atento S.A. **Nov 2019 - Sep 2022**

Managed and maintained large customer databases, working with customer information and data records across T3 and internal CRM platforms. Supported data organization, updates, and information accuracy to help ensure reliable customer records.
